## ABOUT ME

I'm B.Tech Computer Science student at Jaypee University of Information Technology, Solan. Passionate about software engineering, problem-solving, and building impactful web applications. Actively working on projects involving Python, Flask, and full-stack development. Strong team player, fast learner, and self-motivated to deliver real-world solutions.

## KEY COMPETENCIES

Problem Solving and Critical Thinking.	Excellent communication skills
Programming Fundamentals (e.g., C++, Python, JavaScript)	Front-End Development: HTML5, CSS3
Version Control: Git & GitHub	Object-Oriented Programming (OOP)

## EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech) – Computer Science & Engineering  
Jaypee University of Information Technology, Solan, Himachal Pradesh  
Expected Graduation: 2027

## EXTRACURRICULAR ACTIVITIES

- Relevant Subjects: Data Structures, Web Development, Operating Systems, DBMS
- Activities: Member of Coding Club, Hackathon Participant
- Python Basics Certification
- Web Development Bootcamp

## TECHNICAL PROFILE

**Leetcode:** Active Problem Solver (50+ Problems Solved)  
[<https://leetcode.com/u/Codewithprashant/>]

**GitHub:** [<https://github.com/codeanytimeprashant>]

## PROJECTS

### College Feedback System

**Tech Stack:** Python, Flask, HTML, CSS, MySQL

**Description:**

Built a full-stack web application to collect anonymous student feedback on college courses and faculty. Developed login functionality with role-based access (admin, faculty, student) and implemented feedback analysis reports.

### University Bidding System

**Tech Stack:** Python, Flask, HTML, CSS, MySQL

**Description:**

Developed a system where students can bid for university courses based on their priorities and credits. Ensured real-time validation and fairness in course allocation. Designed with secure login, session tracking, and dynamic bidding updates.
